

Boric Acid

Specifications

Property	Value
Article Name	Boric Acid
Alias	Boric Acid /Boracic acid/ Orthoboric acid
Molecular Formula	H3BO3
Molecular Weight	61.83
Color	White
Appearance	Powder/Crystal
Payment Terms	TT/LC
Minimum Order Quantity	Any Amount
Port	TIANJIN, CHINA
Package	Plastic woven bag with plastic inside liner,25KG/bag, 24mts/20' FCL
Delivery Time	18 days after receiving your deposit or the opening of relative LC
Article Name	Boric Acid

Applications

CAS NO. 10043-35-3

EC NO. 233-139-2

HS Code 2810002000

Used to produce boric acid ointment, disinfectant, astringent, antiseptic etc. in pharmaceutical industry.

Used to produce kinds of Borate salts, boron fertilizer etc.

Used as weak acid bath and buffer agent for chemical treating solution in the electroplating industry.

Used to produce cosmetics, medicated soap and cockroach killer in daily chemical.

Used to produce glaze and pigment in ceramic industry.

Used as preservative for timber and analytical chemistry reagent.

Used as additive, solvent in boron steel production in metallurgy.

Used as the raw material of Borosilicate glass.

Packaging and Storage:

Plastic woven bag with plastic inside liner, 25KG/bag, 24mts/20' FCL

Sealed, stored in ventilating and dry place, away from heat, fire and alkali.

Boric Acid/Boric Acid /Boracic acid/ Orthoboric acid
